

For we are cursed to live in perpetual motion.  
Never to stop and ponder, only to move onto  
the next item on our endless list of errands  
before the sand in our vials run out.

The only way to stop time is to capture light  
onto film or sensor, and to fully frame that  
photo in remembrance of that exact moment in  
time and space.

#### ***PERPETUAL***

is a collection of these fleeting moments  
over the past year. Captured on a RICOH GR-1  
stuffed away in my backpack as I travelled  
this world.

I hope these moments remind you to view life  
with more attention so you may enjoy more of  
your time on Earth.
